INSTRUCTIONS  
AND CARE NOTICE

## **INSTRUCTIONS AND CARE NOTICE**

**The V12-engine-inspired storage and display case is delivered fully assembled. The top has been colored using Ferrari's own red wrinkle paint, the same used on their engines. Treat it like a V12 250 engine!**

The chrome-colored parts have been sandblasted with aluminum powder to preserve the metal's natural feel. They are extremely sensitive to sweat, dirt, and harsh chemicals, so make sure to always use the gloves provided when handling these parts of the case. When cleaning, use a damp cotton cloth to remove any marks or fingerprints—don't use abrasive surfaces or products, as chemicals could make stains more visible.

The case is fitted with rubber feet to prevent scratches or other damage to the surfaces it's displayed on.

To take the book out of the case, remove the metal middle bar. The foam inserts inside the lid panels can be placed under the book for support.
